THERMOCHIMICA ACTA, VOLUME 157 (1990)

SUBJECT INDEX

Acetonitrile,
Isothermal vapour–liquid equilibrium for the methanol–ethanol–acetonitrile–benzene system 95
Acetophenone,
Excess enthalpies of binary measures of acetophenone with benzine and substituted benzenes 83
Alkanaminium bromides,
Thermal properties and thermochemistry of alkanaminium bromides 259
Alkanes,
Impurity effects on the solubility of high molecular weight normal alkanes in ethylbenzene 241
Alkylcyclopentene,
Application of the UNIFAC model to alkylcyclopentene mixtures 113
Aluminium,
A thermometric titration study of the interaction of Al^{3+}, Cd^{2+}, Pb^{2+} and Zn^{2+} with ethylenediaminetetraacetic acid 335
Amino groups,
Thermodynamics of dipeptides. Part II. Influence of methyl groups on the α free carboxyl and amino groups. Study of a symmetrical system 279
Ammonium hexavanadate,
Observations on the role of structural disorder in the thermal reactions of ammonium hexavanadate 357
Amphiphile,
Analysis and interpretation of excess molar properties of amphiphile + water systems. I. Excess molar volumes V^E for 1-propanol + water 295
Aromatic bases,
Thermal features, thermolysis and thermochemistry of hexachlorostannates of some mononitrogen aromatic bases 137
Arsenic,
On the crystallization kinetics of glassy alloys in the Cu–As–Se system 181

Barium hydroxide,
The thermochemical and thermophysical functions of solid $Sr(OH)_2$ and β-$Ba(OH)_2$ 307
Belousov–Zhabotinskii reaction,
Limit cycle relations between the heat production rate and key intermediate concentrations in the oscillating Belousov–Zhabotinskii and Briggs–Rauscher reactions 369
Benzene,
Excess enthalpies of binary measures of acetophenone with benzene and substituted benzenes 83
Isothermal vapour–liquid equilibrium for the methanol–ethanol–acetonitrile–benzene system 95
Briggs–Rauscher reaction,
Limit cycle relations between the heat production rate and key intermediate concentrations in the oscillating Belousov–Zhabotinskii and Briggs–Rauscher reactions 369

Cadmium,
A thermometric titration study of the interaction of Al^{3+}, Cd^{2+}, Pb^{2+} and Zn^{2+} with ethylenediaminetetraacetic acid 335
Calcium bromate,
Thermal decomposition of gamma-irradiated calcium bromate 69
Carbon dioxide,
Computer simulation of thermogravimetric curves for carbonate decomposition in carbon dioxide atmospheres 89
Carbonate,
Computer simulation of thermogravimetric curves for carbonate decomposition in carbon dioxide atmospheres 89
Carboxyl groups,
Thermodynamics of dipeptides. Part II. Influence of methyl groups on the α free carboxyl and amino groups. Study of a symmetrical system 279
Cobalt compounds,
The thermal light emission of *cis*-$[Co(en)_2(NO_2)_2]NO_2$ and *cis*- and *trans*-$[Co(en)_2(NO_2)_2]NO_3$ 395
Combustion,
Determination of the enthalpies of formation of solid solutions in the Ta–S system by combustion calorimetry 123
Kinetics of liquid hydrocarbon combustion using the DSC technique 37
Computer simulation,
Computer simulation of thermogravimetric

curves for carbonate decomposition in carbon dioxide atmospheres 89
Control system,
Microcomputer-aided control syst for a precision water bath in the heat-exchange calorimeter 163
Copper,
On the crystallization kinetics of glassy alloys in the Cu–As–Se system 181
Copper chelates,
Dehydration kinetics of the copper(II) chelate of salicylhydrazide: a thermogravimetric study 203
Correlation,
Correlation between the shape of controlled-rate thermal analysis curves and the kinetics of solid-state reactions 171
Cross-linking,
Effect of cross-linking on the crystallization and fusion behaviour of polyethylene–ethylene propylene diene terpolymer blends 45
Crystallization,
Effect of cross-linking on the crystallization and fusion behaviour of polyethylene–ethylene propylene diene terpolymer blends 45
On the crystallization kinetics of glassy alloys in the Cu–As–Se system 181

Decomposition,
Computer simulation of thermogravimetric curves for carbonate decomposition in carbon dioxide atmospheres 89
Thermal decomposition of gamma-irradiated calcium bromate 69
Decomposition,
Thermal decomposition in air of hydrated vanadyl sulphate 155
Degradation,
Thermal degradation of some new coordination polymers 233
Dehydration,
Dehydration kinetics of the copper(II) chelate of salicylhydrazide: a thermogravimetric study 203
Mechanism of dehydration of $Zn_{0.5}Mg_{0.5}(H_2PO_4)_2 \cdot 2H_2O$ 1
Study of the thermal dehydration of $Zn_{0.5}Ca_{0.5}(H_2PO_4)_2 \cdot 2H_2O$ 11
Devitrification,
Non-isothermal devitrification and electrical conductivity of glasses near the Li_2SiO_3 composition 77
Diffusion,
Measurement of the rate of intracrystalline diffusion of saturated hydrocarbons in zeolite ZSM-5 23
Dipeptides,
Thermodynamics of dipeptides. Part II. Influence of methyl groups on the α free carboxyl and amino groups. Study of a symmetrical system 279

Electrical conductivity,
Non-isothermal devitrification and electrical conductivity of glasses near the Li_2SiO_3 composition 77
Electrical studies,
Thermal and electrical studies of some europium comounds with organic ligands 61
Enthalpy increments,
Enthalpy increments of silver from 560 to 900 K 315
Ethanol,
Isothermal vapour–liquid equilibrium for the methanol–ethanol–acetonitrile–benzene system 95
Ethylbenzene,
Impurity effects on the solubility of high molecular weight normal alkanes in ethylbenzene 241
Ethylenediaminetetraacetic acid,
A thermometric titration study of the interaction of Al^{3+}, Cd^{2+}, Pb^{2+} and Zn^{2+} with ethylenediaminetetraacetic acid 335
Europium,
Thermal and electrical studies of some europium comounds with organic ligands 61
Excess enthalpies,
Excess enthalpies of binary measures of acetophenone with benzene and substituted benzenes 83
Excess molar properties,
Analysis and interpretation of excess molar properties of amphiphile + water systems. I. Excess molar volumes V^E for 1-propanol + water 295

FeV_2O_4,
The high temperature oxidation of FeV_2O_4 347
Fusion,
Effect of cross-linking on the crystallization and fusion behaviour of polyethylene–ethylene propylene diene terpolymer blends 45

Glasses,
Non-isothermal devitrification and electrical conductivity of glasses near the Li_2SiO_3 composition 77
Glassy alloys,
On the crystallization kinetics of glassy alloys in the Cu–As–Se system 181

H_2PtCl_6,
Reactions of H_2PtCl_6 on HY zeolite 321
Heat exchange calorimeter,
Microcomputer-aided control system for a precision water bath in the heat-exchange calorimeter 163
Heat production,
Limit cycle relations between the heat production rate and key intermediate concentrations in the oscillating Belousov–Zhabotinskii and Briggs–Rauscher reactions 369
Hexachlorostannates,
Thermal features, thermolysis and thermochemistry of hexachlorostannates of some mononitrogen aromatic bases 137
Hydrocarbons,
Kinetics of liquid hydrocarbon combustion using the DSC technique 37
Measurement of the rate of intracrystalline diffusion of saturated hydrocarbons in zeolite ZSM-5 23
Hydroxyacetophenonethiosemicarbazone,
Evaluation of thermodynamic parameters of bivalent metal complexes of 2-hydroxyacephenonethiosemicarbazone (2-HATS) 365

Impurities,
Impurity effects on the solubility of high molecular weight normal alkanes in ethylbenzene 241
Interaction,
Interaction of kerogen and mineral matrix of Göynük oil shale in an air atmosphere 193
Irradiation,
Thermal decomposition of gamma-irradiated calcium bromate 69

Kerogen,
Interaction of kerogen and mineral matrix of Göynük oil shale in an air atmosphere 193
Kinetics,
Correlation between the shape of controlled-rate thermal analysis curves and the kinetics of solid-state reactions 171
Kinetics of liquid hydrocarbon combustion using the DSC technique 37

Lead,
A thermometric titration study of the interaction of Al^{3+}, Cd^{2+}, Pb^{2+} and Zn^{2+} with ethylenediaminetetraacetic acid 335
Li_2SiO_3,
Non-isothermal devitrification and electrical conductivity of glasses near the Li_2SiO_3 composition 77
Light emission,
The thermal light emission of *cis*-[$Co(en)_2(NO_2)_2$]NO_2 and *cis*- and *trans*-[$Co(en)_2(NO_2)_2$]NO_3 395
Limit cycle relations,
Limit cycle relations between the heat production rate and key intermediate concentrations in the oscillating Belousov–Zhabotinskii and Briggs–Rauscher reactions, 369

Maturing,
Instrumental multiparametric study of the maturing of therapeutic muds of some Italian spas 377
Metal complexes,
Evaluation of thermodynamic parameters of bivalent metal complexes of 2-hydroxyacephenonethiosemicarbazone (2-HATS) 365
Methanol,
Isothermal vapour–liquid equilibrium for the methanol–ethanol–acetonitrile–benzene system 95
Methyl groups,
Thermodynamics of dipeptides. Part II. Influence of methyl groups on the α free carboxyl and amino groups. Study of a symmetrical system 279
Mineral matrix,
Interaction of kerogen and mineral matrix of Göynük oil shale in an air atmosphere 193
Mud,
Instrumental multiparametric study of the maturing of therapeutic muds of some Italian spas 377
Multiparametric study,
Instrumental multiparametric study of the maturing of therapeutic muds of some Italian spas 377

Naphthalene,
Thermodynamic functions for the transfer of naphthalene from water to mixed aqueous solvents at 298.15 K 105

Oil shale,
Interaction of kerogen and mineral matrix of Göynük oil shale in an air atmosphere 193
Organic ligands,
Thermal and electrical studies of some europium compounds with organic ligands 61
Oxidation,
Kinetics and mechanism of pyrite oxidation 215
The high temperature oxidation of FeV_2O_4 347

Phase diagrams,
$NaCl–ZnCl_2$ phase diagram 329
Plastic bar,

Governing equation for the temperature distribution in a transparent plastic bar 221
Polymers,
Thermal degradation of some new coordination polymers 233
Propanol,
Analysis and interpretation of excess molar properties of amphiphile + water systems. I. Excess molar volumes V^E for 1-propanol + water 295
Pyrite,
Kinetics and mechanism of pyrite oxidation 215

Salicylhydrazide,
Dehydration kinetics of the copper(II) chelate of salicylhydrazide: a thermogravimetric study 203
Selenium,
On the crystallization kinetics of glassy alloys in the Cu–As–Se system 181
Silver,
Enthalpy increments of silver from 560 to 900 K 315
Sodium chloride,
$NaCl–ZnCl_2$ phase diagram 329
Solid solutions,
Determination of the enthalpies of formation of solid solutions in the Ta–S system by combustion calorimetry 123
Solid state reactions,
Correlation between the shape of controlled-rate thermal analysis curves and the kinetics of solid-state reactions 171
Solubility,
Impurity effects on the solubility of high molecular weight normal alkanes in ethylbenzene 241
Strontium hydroxide,
The thermochemical and thermophysical functions of solid $Sr(OH)_2$ and β-$Ba(OH)_2$ 307
Structural disorder,
Observations on the role of structural disorder in the thermal reactions of ammonium hexavanadate 357
Sublimation,
Vapour pressure and sublimation enthalpy of zinc selenide and zinc telluride by thermogravimetric Knudsen–effusion method 287
Sulphur,
Determination of the enthalpies of formation of solid solutions in the Ta–S system by combustion calorimetry 123

Tantalum,
Determination of the enthalpies of formation of solid solutions in the Ta–S system by combustion calorimetry 123
Temperature distribution,
Governing equation for the temperature distribution in a transparent plastic bar 221
Temperature error,
Simple estimation of the temperature error in thermogravimetric experiments 249
Terpolymers,
Effect of cross-linkinng on the crystallization and fusion behaviour of polyetheylene–ethylene propylene diene terpolymer blends 45
Thermochemistry,
Thermal features, thermolysis and thermochemistry of hexachlorostannates of some mononitrogen aromatic bases 137
Thermodynamic functions,
Thermodynamic functions for the transfer of naphthalene from water to mixed aqueous solvents at 298.15 K 105
Thermolysis,
Thermal features, thermolysis and thermochemistry of hexachlorostannates of some mononitrogen aromatic bases 137
Thermometric titration,
A thermometric titration study of the interaction of Al^{3+}, Cd^{2+}, Pb^{2+} and Zn^{2+} with ethylenediaminetetraacetic acid 335
Transfer,
Thermodynamic fucntions for the transfer of naphthalene from water to mixed aqueous solvents at 298.15 K 105

UNIFAC model,
Application of the UNIFAC model to alkylcyclopentene mixtures 113

Vanadyl sulphate,
Thermal decomposition in air of hydrated vanadyl sulphate 155
Vapour–liquid equilibrium,
Isothermal vapour–liquid equilibrium for the methanol–ethanol–acetonitrile–benzene system 95
Vapour pressure,
Vapour pressure and sublimation enthalpy of zinc selenide and zinc telluride by thermogravimetric Knudsen–effusion method 287

Water,
Analysis and interpretation of excess molar properties of amphiphile + water systems. I. Excess molar volumes V^E for 1-propanol + water 295
Thermodynamic functions for the transfer of naphthalene from water to mixed aqueous solvents at 298.15 K 105

Water bath,
Microcomputer-aided control system for a precision water bath in the heat-exchange calorimeter 163

Zeolites,
Reactions of H_2PtCl_6 on HY zeolite 321
Zinc,
A thermometric titration study of the interaction of Al^{3+}, Cd^{2+}, Pb^{2+} and Zn^{2+} with ethylenediaminetetraacetic acid 335
Zinc chloride,
$NaCl–ZnCl_2$ phase diagram 329
Zinc selenide,
Vapour pressure and sublimation enthalpy of zinc selenide and zinc telluride by thermogravimetric Knudsen–effusion method 287
Zinc telluride,
Vapour pressure and sublimation enthalpy of zinc selenide and zinc telluride by thermogravimetric Knudsen–effusion method 287
$Zn_{0.5}Ca_{0.5}(H_2PO_4)_2 \cdot 2H_2O$,
Study of the thermal dehydration of $Zn_{0.5}Ca_{0.5}(H_2PO_4)_2 \cdot 2H_2O$ 11
$Zn_{0.5}Mg_{0.5}(H_2PO_4)_2 \cdot 2H_2O$,
Mechanism of dehydration of $Zn_{0.5}Mg_{0.5}(H_2PO_4)_2 \cdot 2H_2O$ 1
